The Marble Hill Press | ELECTRIC ROAD PLANS

Panama Engineer to Be Chief Constructionist at E-rormous Salary

New York: The mystery about the \$65,000-a-year position for which John F. Wallace resigned as chief engineer of the Panama Canal is explained by the discovery of another gigantic scheme of high finance.

The man who induced Wallace to leave his post on the isthmus is Gea. Westinghouse, president of the Westinghouse Air Brake Company. Mr. Westinghouse, author of the big financial scheme, needed the prestige of a man like Wallace prominently identified with a large Government undertaking. The Westinghouse scheme is to

build electric lines to parallell steam roads wherever, in any part of the country, there seems to be a chance for profitable competition. As soon as one of these lines was finished, it was to be secretly transferred to the competing company. While it and the other that should follow it were to be operated by apparently independent companies, the operating corporations were to be merely dummy concerns and the receipts were to go into the treasuries of the steam roads. There was to be no real competition

and no rate wars. It was planned that every electric line built would be sold to a steam "How to Know the Wild Flowers from railroad at a handsome profit a share to go to Mr. Wallace, who was guaranteeing his total income should not fall before \$65,000. Naturally, a part of the profits, it was agreed, would have to go to high railroad officials, but these would be recovered by the sale of stock to the public.

It will be remembered that Mr. Wallace cabled his acceptance of the mysterious proposition to join another enterprise, but it is now asserted that the cabled acceptance was with a mental reservation. The Chief Engineer is alleged to have believed when he came to New York that be could use the offer as a club to force Secretary Taft to raise his salary to \$65,000 a year and make him Chair-Let poor old Mars lock up and spend man of the commissoin, so that he could live in Washington on the theory that he was familiar with the work on the isthmus, and could better diease germs it must be admitted with rect it from the Capital than any othsome reluctance that there are no er man. country seat. It was six months afterwards that ered ottoman by the window side, sobthe Sparhawk, who had been given the bing. command of a troop of good Hohenstein lancers, asked permission to go on a journey.

"Whither would you go?" asked his

"To Courtland," he confessed, somewhat reluctantly, looking down at the peaked toe of his tanned leather riding boot.

"And what takes you to Courtland?" said Joan: "you are in danger there. Besides, would you leave my service and engage with some other?"

"Nay, my lady," he burst out; "that will not I, so long as life lasts! Butbut the truth is"-he hesitated as he spoke-"I cannot get out of my mind the Princess who kissed me in the dark. The like never happened before to any man. I cannot forget her, do what I will. No, nor rest till I have looked upon her face."

"Wait," said Joan, "Only wait till the spring and it is my hap to ride to Courtland for my marriage day. Then I promise you you shall see somewhat of her-the Lord send it be not more than enough!

So through many bitter days the Sparhawk abode at the castle of Kernsberg, Ill content.

CHAPTER IX.

The Sparhawk in the Toils. It was the end of May, and the full bursting glory of a northern spring, when at last the bridal cavalcade wound down from the towers of the

Castle of Kernsberg. As they rode toward the gate of Courtland they were aware of a splendid cavalcade which came out to receive them in the name of the prince, and to conduct them with honor to the palace prepared for them.

In the center of a brilliant company rode the Princess Margaret. At sight of the duchess' party the princess alighted from her steed with the help of a cavalier. At the same moment London: Field Marshal Lord Rob- Joan of the Sword Hand leaped down

The face of the princess showed he deliberately expressed his opinion. trace of emotion. She appeared to be struggling with some recollection she was unable to locate with precision. "I hope you will be very happy with

my brother," she faltered; then after a moment she added, "Have you not Lord Roberts did not blame the perchance a brother of your own?" But before Joan could reply, a representative of the prince had come forward to conduct the bride-elect to her rooms, and the princess gave place to him.

But all the same she kept her eyes keenly about her, and presently they rested with a sudden brightness upon the young Dane, Maurice von Lynar, at the head of his troop of horses.

"He is different-he is changed." she said to herself; "but how-wait till we get to the palace, and I shall soon find out."

And immediately she caused it to be intimated that all the captains of troops and the superior officers of the escort of the Duchess Joan were to be entertained at the palace of the Princess Margaret.

So at that moment when Joan was taking her first survey of her chambers, which occupied one entire wing of the great palace of the Princess of Courtland, Margaret the impetuous had already commanded the presence ommanders of the bridal escort.

The Princess Margaret was standing by the window as the young man her at the spring of his neck Werner entered. Her golden curls flashed in the late sunshine, which made a kind of haze of light about her head as she it up with a little shudder, "that on urned the resentful brilliance of her yes upon Maurice von Lynar.

He must abide in solitude for this day at least. Your highness is apprently nore fortunate!"

The purpose of the insult was plain: out the Princess Margaret restrained herself, not, however, hating the insulter less.

"I pray you, Prince Ivan," she said, return to my brother and tell him that his commands are ever an honor, and shall be obeyed to the letter." She bowed in dignified dismissal. Prince Wasp swept his plumed hat along the floor with the depth of his retiring salutation, and in the same noment he flashed out his sting. "I leave your highness with less reeret as I perceive that solitude has its empensations!" he said.

The pair was left alone, but all hings seemed altered now. Margaret of Courtland was silent and distrait. Von Lynar had a frown upon his brow. and his eyes were very dark and Then all suddenly her pride gave angry. a little summer breathing space at a way. Their alleged victim was Mrs James Smith, white, a widow. The crime was committed Saturday night. The police found her nude, lying partly concealed in some bushes on the road side, about three-quarters of a mile from Gadsen, Mrs. Smith had been at tacked on the roadside and after having been repeatedly assaulted, was dragged by her hair down an embank ment, over rocks and stumps into a clump of bushes, where she was left after efforts had been made to con ceal her body. The details of her condition were shocking.

A mob of 300 people gathered on Broad street in Gadsen near dark and marched on the 'iail, demanding that the doors be opened. One young man had the rope ready to swing Vanc€ Gardner, one of the negroes implicat-Sipinhai, Manchuria: Quiet con- ed in the killing. Sheriff Chandler talks and a part of the mob dispersed.

BONAPARTE PAYS FARE

New Cabinet Member Refuses to Accept Free Transportation.

Washington: Secretary Bonaparte has already made himself unique among Cabinet officers by refusing to accept railroad passes and announce ing that so long as he holds a public office he will pay fare whenever he travels. In accordance with the general practice, the railroads began to send Mr. Bonaparte annual passes as soon as he took office. They have all been returned with a polite note of thanks, in which the new Secretary says that by reason of the public position he occupies he feels unable to avail himself of the courtesy shown. him. Passes are still coming in and being returned by the next mail. All of the other Cabinet members make free use of the annual passes with which they are supplied by all of the big railroads and never think of paying fare. If they have not an annual pass on a road which they wish to travel over they request trip passes, which are promptly furnished. The President now pays full fare whereever he goes, and also pays for a private car whenever he uses one.

NEGRO STOWAWAY MUHDERS TWELVE PERSONS AT SEA

New Orleans, La.: One of the most shocking stories of murder, with robbery as the motive, in the annals of crime was brought to this city Monday by Captain Hans Holms of the plies between New Orleans and Honduranean ports. It was subsequently confirmed by the officers of the fruit steamer Rosina, which came later in the evening with additional de-

The little Island of Utilla, lying off the Honduranena Coast and whose population is an indiscriminate mixture of whites, Caymanites and Caribs, was the scene of the tragedy, in

which twelve lives were sacrificed. The captain of the schooner Olympla was about to take a trip to Ruatan, Truxillo and Belize. He had about 1,400 sols, and was to buy oattle at Truxillo to sell at Belize. He carried a crew of four, and nine passengers, making the total 13. Among these were two women and two child-

ren. z The vessel left the harbor of Utilia at 11 o'clock, June 30. After she had been under way less than an hour the persons on board were aroused by a shot. Rushing on deck, they found a negro, armed with a Winchester rifle shooting down the men one after another. This negro was Robert McGill and it was afterwards developed, he had stowed bimself away aboard with the intention of robbing the captain and then swimming ashore.

After he had killed all but one of to go below and scuttle the slip.

McGill then but the two women. Miss Elsie Morgan and her gister, Mrs. Walter Rose, in the dory with Mrs. Rose's six-weeks-old infant, and

departed for the mainland. A few moments later he evidently changed his mind about sparing the women and killed Mrs Rose and her infant. Then he began shooting at Miss Morgan and wounded her in the arm. She jumped overboard and started to swim back to the island. The negro fired at her ineffectually, but his ammunition evidently gave out, for he promised her immunity from harm if she would come back to her on the head with an oar, stunning her. Believing she was dead, he

rowed away toward the mainland. Miss Morgan swam back to the island, where she was thrown on the beach by the waves in an exhausted condition. She feared that the negro would follow her, so she hid in the bushes, and for two days suffered from the heat an exposure until found by a woman from her neighborhood

and rescued from starvation. When Miss Morgan told her story an immediate search was instituted for McGill, and the authorities on the mainland were notified. They caught him at Elporvinir, a little town on the road to Ceiba, and there was quite a demonstration, but he was urotected. His life was saved through the presence on the coast of President Bonilla, who was on an inspec-
